Andrés Velasco

Profile

Senior UX/UI and brand designer with more than 15 years in design and advertising. I started in graphic design, building identities, campaigns and event experiences, and grew into product design for healthcare, insurance, agriculture and professional education.

Since 2020 I've been a consultant at SDG (Solution Design Group), partnering with business leaders, product owners and developers to turn complicated workflows into tools people can use, and giving teams design systems that keep growing products consistent. Bilingual in English and Spanish.

Highlights

- Helped stand up a white-label design system for Cargill, one of the largest privately held companies in the world, along with the documentation, onboarding and ceremonies around it
- Led modernization of client applications and websites, including Human Powered Health's training app and the Component Assembly Systems website
- Created the brand identity for Harris County Public Health, one of the largest public health departments in the US, and set brand standards across the organization
- Designed and managed event materials for a nationwide filmmaking masterclass tour with Saturday Night Live personnel
- Managed the Harris County Public Health website, which serves 4.7 million residents
- Designed myCargill, Cargill's self-serve customer portal, with the product owner and business analyst
- Led the design system team and project at ProAg, a crop insurance company, and contributed to its UX strategy, quoting research and research repository
- Designed the attendee experience for recurring conferences, from visuals across print, digital and displays to logistics

Roles
UX/UI Designer
Graphic Designer
Web Developer
Project Manager

Skills
Client Engagement
Needs Analysis
Proposal Writing
UX Design Principles
Usability Testing
User Acceptance Testing
Wireframing
Prototyping
Accessibility
Spatial Design

Tools
Figma
Adobe CC
HTML, CSS
Azure DevOps
Miro
Microsoft Office
Power BI
SharePoint
Salesforce

Methodologies
Agile Methodology
Design Thinking
User-Centered Design
Double Diamond
Lean UX

Industry Experience
Healthcare
Agricultural Insurance
Agricultural Commodities
Marketing & Advertising

Education & Certifications
BFA, Graphic Design, The Art Institute of Houston

Experience

Consultant
SDG (Solution Design Group), March 2020 to Present

Partners in Excellence

- Assessed clinical, financial and HR data sources with cross-functional stakeholders and designed the framework for one role-aware reporting dashboard across all three.

- Designed five role-based Power BI views (Organization, Center, Department, Pod and Rehabilitation) in a “cascade of granularity” layout, so people drill down instead of switching between reports.

- Worked with the technical team to match relational data sources to what Power BI can show, within row-level security (RLS) rules.

- Set design system guidelines, component structures and chart standards for accessible reports on desktop and mobile.

Holmes Corporation

- Ran a heuristic review of a learning system and its assessments to find where the design most needed work.
- Redesigned login, product selection, loading screens, the main learning flows, lesson readings, inline definitions, and search and glossary for a micro-credential product.
- Drew original icon sets for the interface.
- Facilitated stakeholder workshops on SAGE, a professional development portal, and analyzed what its users need from it.
- Turned the findings into four themes (personalization, integration, engagement and accessibility) and a prioritized set of recommendations.
- Made the case for user-centered development of SAGE while addressing stakeholder concerns about integration and data management.

HealthPartners

- Interviewed stakeholders about their needs, pain points and expected workflows.
- Designed the data model and user journeys for contract management and pricing calculations, replacing manual steps.
- Built mid-fidelity designs to test with stakeholders early, catching issues before development.
- Designed to accessibility guidelines from the start.
- Worked with developers, data analysts and business stakeholders through implementation.
- Helped deliver an application that reduces errors and makes pricing calculations more accurate, saving costs and increasing revenue.

Twin Cities Orthopedics / Revo Health: Habits to Health

- Interviewed internal stakeholders about their roles and mapped each group's part in the current process.
- Ran workflow workshops on how stakeholders expected the process to work, then designed a new process that met every group's needs and showed what the new tools improved.
- Worked with campaign vendors to find the best fit for the company's needs, workflows and technical architecture.
- Designed campaigns and engagement workflows that guide partner companies' employees toward healthier habits, with weekly challenges tailored by an initial health assessment and incentives for taking part.

Twin Cities Orthopedics / Revo Health: EXCEL

Prioritized disqualifying factors with the team to speed up patient qualification, including automating parts of the assessment.

- Automated patient communications and reminders, removing duplicate work and saving the organization money.
- Reworked the application's patterns to follow how nurses actually work.
- Captured patient data and program outcomes for program evaluation.
- Integrated with existing TCO systems to cut duplicate entry and improve data accuracy.

Human Powered Health

- Led modernization of an existing training app for athletes.
- Audited the app's technology stack, infrastructure limits and user behavior.
- Introduced consistent design patterns to improve performance, usability and scalability.
- Defined scope, timeline and resources for each modernization phase.
- Refreshed the interface within the Material UI framework, with responsive layouts for mobile.

Component Assembly Systems (CAS)

- Led modernization of the company website to improve usability, functionality and engagement.
- Evaluated the existing site for pain points, strengths and user needs.
- Set goals and success metrics for the new site.
- Researched industry practices and technologies for the rebuild.
- Built the project roadmap, milestones and deliverables.
- Led critiques and brainstorms with junior designers, pushing the work creatively while keeping it usable.
- Created low-fidelity wireframes to align on layout and functionality.
- Wrote the content strategy and migration plan.
- Chose the build platform (Wix) for usability, accessibility, responsiveness and easy upkeep.
- Tested with users throughout development.
- Tested the site for functionality, compatibility and security.

ProAg

- Led the design system team and project, grounded in ProAg's internal systems, information architecture and the crop insurance processes of internal and external stakeholders.
- Ran planning workshops to set priorities.
- Interviewed internal stakeholders about their current design system and pitched options that fit IT and product management's expectations and feasibility concerns.
- Organized ProAg's Figma workspace and created the documentation, ceremonies, templates and onboarding for people joining it.

Cargill

- Designed myCargill, an online customer portal, with the product owner and business analyst.
- Helped stand up a white-label design system for Cargill's products worldwide.
- Set up a QA process with developers, including how to negotiate feasibility and translate design into development.
- Wrote documentation, onboarded and trained new team members, set up ceremonies, and audited global products using the design system.
- Updated the user experience of the company website with the Director of Communications and a junior designer.
- Created a company-wide standard for gathering user feedback.
- Designed a Power BI dashboard with the global IT group that turns complex application health data into role-based views, so people at each level can find and report on the data they need.
    - Ran working sessions with internal stakeholders to shape reports around each level's decisions.
    - Checked in often with developers to keep the designs buildable in Power BI.
    - Documented design decisions against data-visualization best practices.
    - Built a component set on top of that documentation so future dashboards scale consistently.

Senior Designer/Web Master
Harris County Public Health, 2015 to 2020

- Created the brand identity for one of the largest public health departments in the US and set brand standards across the organization.
- Co-designed print and digital materials, displays and lighting for several recurring annual conferences.
- Designed print and digital materials for the organization and its divisions.
- Managed and maintained the website that informs 4.7 million county residents.
- Tracked site performance in Google Analytics and presented the results.
- Set up intake and task-management processes between work groups.

- Technologies used: DotNetNuke, Google Analytics, Adobe Creative Suite, SketchUp, photography and video equipment

Graphic Designer
Raintree Resorts International, 2014 to 2015

- Designed a monthly digital-magazine newsletter emailed to members.
- Produced bi-monthly email campaigns.
- Designed responsive HTML landing pages for resort promotions tied to Google and Facebook ads.
- Designed and monitored Facebook ads and posts.
- Edited resort photography for print and digital use.
- Designed menus, flyers, and banners for proprietary bars and restaurants.
- Technologies used: Adobe Creative Suite, WordPress

Graphic Lead
Hudson Trail Outfitters, 2013 to 2014

- Designed store promotions for web and print.
- Coordinated with print shops and organized distribution.
- Created a display standard and an interior layout flow for stores to follow.
- Entered product data and images in Magento.
- Reported on top-selling products online and recommended ways to increase engagement.
- Technologies used: Magento, Adobe Creative Suite

Graphic Designer
Monte Zucker Photographic Education, 2012 to 2013

- Worked with Saturday Night Live personnel on a masterclass tour that traveled the US teaching filmmakers.
- Tailored designs for event sponsors using their marketing kits.
- Helped the creative director design event posters, email campaigns, websites and widgets, animated banners, film-tour props, and Facebook and Twitter graphics, and maintained the website.
- Technologies used: Adobe Creative Suite, photography and video equipment
